A door with dual power

**अब हर वार, होगा बेकार
MOISTRO DOORS हैं तैयार**

MOISTRO - DOORS WITH DUAL POWER

A new chapter in door technology begins. For the first time in India, Action TESA introduces Moistro, a breakthrough door construction that brings together strength, stability, and lightweight performance in one problem-free solution.

Developed for modern spaces where performance, durability, and finish matter equally, Moistro is built with a Moist Master core and HDHMR on all sides, delivering high strength while remaining lightweight. The HDHMR outer layers provide a smooth, even surface ideal for veneers, laminates, paint, and other finishes, ensuring consistent results.

Designed for reliable, trouble-free use, Moistro offers strong resistance to moisture, borers, and termites, along with excellent screw-holding strength, resistance to bending, and lasting stability. The ready-made door base further reduces on-site work and speeds up installation.

Moistro is not just a door. It is a smarter, stronger, and more dependable foundation for modern spaces, built to perform, built to last, and built to redefine expectations.

KEY FEATURES

MOISTURE RESISTANT
Resists swelling, warping, and weakening caused by humidity or water exposure.

TERMITE & BORER RESISTANT
Built-in protection helps guard against destructive pests.

STRONG SCREW HOLDING CAPACITY
Hinges and hardware remain secure over years of use.

HIGH DENSITY CORE
Enhances durability, structural strength, and premium feel.

150+ SHADES AVAILABLE
A wide spectrum of finishes to suit any interior style.

BUILT DIFFERENT. BUILT AHEAD.

Action TESA is one of India’s largest manufacturers of engineered wood panel products and a brand known for bringing meaningful innovation to the interior infrastructure industry. Over the years, it has introduced industry-defining products like HDHMR, Boilo, Moist Master, amongst others that have gone on to set new benchmarks in performance, durability, and reliability. With a strong focus on technology, quality, and understanding real on-site needs, Action TESA has consistently stayed ahead of the curve. This approach is captured in its belief, “Koi Nahi Aisa” a reflection of its commitment to creating products that truly stand apart and continue to move the industry forward.

MOISTRO DOORS VS ORDINARY DOORS

Comparison	Moistro™ Door	Ordinary Door
Moisture Resistance	Highly Resistant	Swells & Warps
Termite Protection	Built-in Protection	Requires External Treatments
Core Density	High & Uniform Density	Inconsistent & Hollow
Durability	Long-term Structural Stability	Weakens Over Time
Screw/Hinge Grip	Strong & Reliable	Loosens Over Time
Maintenance	Low	High
Shade Options	150+ Finishes	Limited
Finish	Smooth-Ideal For Veneers & Paint	Rough & Uneven

What Makes Moistro Doors Different?

REVOLUTIONARY 3 LAYERS MOISTRO BOARD

At the core of every Moistro Door lies an engineered structure designed for strength and stability:

- 5.5 mm HDHMR BOARD
- 19/21 mm MOIST MASTER
- 5.5 mm HDHMR BOARD

This precision-built, 3-layer construction ensures a door that feels solid, stays steady, and performs reliably even in demanding environments.
