

When Should You Consult a Urology Hospital in Dwarka? Signs You Should Know

Some urinary issues might arise gradually, whereas some might need immediate medical care. The earlier you recognize the symptoms, the more likely you are to undergo proper medical testing and prevent any risks. For any persistent issue related to the urinary system, visiting an experienced [Urology Hospital in Dwarka](#) will help you understand what is causing your problem and how you can treat it. Ayushman Hospital offers such a medical environment.

1. Chronic Pain in the Back, Side, or Lower Abdomen

Severe pain in the side or back that radiates to the lower abdomen or groin can be related to kidney stones. Such pain can be severe and occur in waves and with vomiting or nausea. However, there are other causes of similar symptoms. Diagnosis of kidney stones in Dwarka will help determine the exact cause of the pain and other symptoms through testing.

2. Blood in the Urine

The presence of blood in the urine, which is medically known as haematuria, is not something that should be ignored even if it is not associated with pain. Several causes of urinary problems, including kidney stones and UTIs, can lead to this particular problem. One may need to undergo a blood test in the urine assessment.

3. Painful/Frequent Urination

Pain while urinating, frequent urges to urinate, or inability to urinate can be due to UTI or another urological problem. These symptoms require a visit to the doctor who will decide on the appropriate course of action. The right painful urination treatment can be found out only after the cause of the problem is diagnosed.

4. When Should You Seek Kidney Stone Treatment in Dwarka?

There is diversity in terms of the size, type, and gravity of the kidney stones. Smaller stones are able to pass out naturally, but there are cases where the intervention of an

expert is required. **Kidney stones specialists in Dwarka** can assess the symptoms and test results and recommend appropriate treatment.

According to the findings, removal of kidney stones treatment would entail medications, shock wave lithotripsy, ureteroscopy, or kidney stones laser treatment. However, in some instances, kidney stone surgery in Dwarka will be recommended.

5. Recurrent Urinary Problems or Difficulty Passing Urine

Multiple occurrences of infections, poor urine flow, problems passing urine or being unable to pass urine may need a visit to a urologist. The type and treatment of obstruction of the urinary tract depend on the cause and site of the obstruction. Not being able to pass urine along with lower abdominal pain requires immediate medical attention.

Visit a Urology Doctor in Dwarka

A timely examination will assist in recognizing various urological disorders and getting proper treatment. Individuals who want to get a **urology treatment in Dwarka**, Ayushman Hospital is one of the places that you can contact to get information about the available urology treatment.

Seek immediate medical attention for cases of severe pain, fever, repeated vomiting, or blood in the urine.
